DETAILED ACTION

1. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to **Group Art Unit 1648**. Applicant's preliminary amendment filed March 20, 2002 is acknowledged and entered. Note that claims 45-48 are not present in the specification. Page 72 has claims 34-44, and page 73 has claims 49-51. According to CFR 1.126, claims 49-51 have been renumbered and will be referred to as claims 45-47. Cancelled claim 50 was renumbered as claim 46 and cancelled. Claims 1-41, 43-45 and 47 are pending.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claims 1-16 and 20-21, 24-29, 32-33 and 47, drawn to a method of modifying a producer cell, the resulting producer cell, and a method of using the producer cell, wherein the method is a recombinase assisted method.
- Group II, claim 17, drawn to a retroviral particle.
- Group III, claims 18-19, 22-23, 30-31, 34-44 and 47, drawn to a producer cell and method of using a producer cell, wherein the method does not require the recombinase assisted method.
- Group IV, claim 45, drawn to a nucleic acid vector.

Art Unit: 1648

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The asserted special technical feature, a recombinase-assisted method of modifying a producer cell, is not shared by all three groups. Group II is drawn to a retroviral particle produced by the producer cell. Group II is a product-by-process claim, and therefore the process is not given patentable weight. The cell and related methods of Group III do not require the recombinase-assisted method of modifying a producer cell. Group IV depends from a non-existent claim, and therefore lacks the special technical feature. Claim 47 is drawn to a method and/or a producer cell "as described herein"; claim 47 will be examined with either Group I or Group III, pending Applicant's election. Therefore, the invention lacks unity because the Groups do not share a special technical feature.

Conclusion

Papers relating to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 located in Crystal Mall 1.
